

Simbología electrónica: Resistencias y condensadores

	Resistencia. Símbolo general		Elemento calefactor
	Resistencia. Símbolo general		Condensador no polarizado
	Resistencia no reactiva		Condensador no polarizado
	Resistencia no reactiva		Condensador variable
	Resistencia variable		Condensador ajustable
	Resistencia variable		Condensador polarizado sensible a la temperatura
	Resistencia variable por escalones		Condensador polarizado sensible a la tensión
	Resistencia ajustable		Condensador electrolítico
	Impedancia		Condensador electrolítico
	Potenciómetro		Condensador electrolítico
	Resistencia variable por escalones		
	NTC (Coef. de temperatura negativo)		
	PTC (Coef. de temperatura positivo)		
	VDR (Resis. dependiente del voltaje)		
	LDR (Resis. dependiente de la luz)		
	LDR (Resis. dependiente de la luz)		

Simbología electrónica: Semiconductores 1

	Diodo rectificador		Transistor NPN
	Diodo rectificador		Transistor PNP
	Diodo rectificador		Transistor uniunión -n- UJT
	Diodo zéner		Transistor uniunión -p- UJT
	Diodo zéner		Fototransistor NPN
	Diodo zéner		Transistor efecto de campo JFET canal p
	Diodo zéner		Transistor efecto de campo JFET canal p
	Diodo varicap		Transistor efecto de campo JFET canal n
	Diodo supresor de tensión		Transistor efecto de campo JFET canal n
	Diodo túnel		Darlington NPN
	Fotodiodo		Darlington NPN
	Diodo emisor de luz (LED)		
	Diodo sensible a la temperatura		
	Puente rectificador		
	Puente rectificador		

Simbología electrónica: Semiconductores 2

	Tiristor SCR		
	Triac		
	Diac		
	MOSFET agotamiento canal n		
	MOSFET agotamiento canal n		
	MOSFET enriquecimiento canal n		
	MOSFET enriquecimiento canal n		
	MOSFET agotamiento canal p		
	MOSFET agotamiento canal p		
	MOSFET enriquecimiento canal p		
	MOSFET enriquecimiento canal p
